

Analytics Trading Terms and Conditions

- 1) All recommendations for T / P and S / L are prescribed in each new signal.
 - 2) Pending orders should be placed with a small margin up to the set signal (2 points for the period M15, 3 points for the period H1, 5 points for the period H4, for gold - 40 points for M15, 60 points for H1 and 100 points for H4).
 - 3) Prior to the release of IMPORTANT NEWS, pending orders are deleted, open positions with the existing plus are protected by the transfer of S / L to the opening prices or the trades are closed at current prices.
 - 4) On Friday evening, before the market closes, pending orders are deleted, and open positions with the existing plus are protected by the transfer of S / L to the opening prices or the trades are closed at current prices.
 - 5) It is strongly recommended NOT to change the size of S / L at your discretion!
 - 6) When trading on a rebound from the line: with a true penetration, T / P is transferred to the opening price (breakeven).
 - 7) True penetration will be considered as 15 points from the broken line on M15, 15-20 points from the broken line on H1 and 20-30 points from the broken line on H4 and marked on the chart with black lines.
 - 8) When trading from the 23rd or 38th Fibonacci level, if the price closes much higher or lower than the 23rd or 38th Fibonacci level, T / P is transferred to the opening price (breakeven).
 - 9) If pending orders are placed on Fibonacci levels, and the movement continues without correction, then we independently move the Fibonacci levels and, accordingly, to these new levels move the established orders.
- 10) RULE OF 5 PERIODS:
- if the pending order does not work within 5 periods - analyze the situation: if the signal is relevant, then we do not remove the pending order, but if the signal is not relevant (the price has significantly moved from the pending order) - it must be removed.
 - if the position is open for more than 5 periods and has not reached TP, analyze the situation: if the signal is relevant, then we wait for it to work out, if there are doubts about its relevance, then it is better to close the deal with the plus that it has, and if the position is in the minuses - TP is transferred to the opening price.

All trading ideas that you receive are purely marketing and / or informational and / or educational in nature and in no way should be perceived as a proposal, motivation or recommendation to buy / sell any financial instrument.
