

Terms and Conditions for Bonuses

- A bonus may be accrued on all account types except demo account.
- The bonus on the first deposit is accrued automatically.
- Bonus funds are used to maintain the margin level. Trading solely with bonus funds is unavailable.
- Bonuses cannot be accrued on the amounts transferred between trading accounts within the same Client Login Page.
- Transfer of the bonus funds from credit to balance is carried out according to the formula: 1 lot of trading operations transfers \$ 3 from the bonus amount to the real funds.
- For example: deposit \$ 1000, bonus 50 %, the bonus amount will be \$ 500, $\$ 500/3=167$ lots, this is the required trading turnover to transfer funds from the bonuses to the real amount.
- The bonus funds cannot be transferred to the balance partially. Only total amount of the bonus can be credited to trading account balance.
- If there are more than one bonus on the Client's account, they are traded in order of their accrual on the trading account.
- Bonuses shall be traded within 90 days from their accrual. As soon as this term expires, bonuses are revoked, provided all trading operations are closed. Bonuses are revoked at 00:00 according the server time.
- Forex Optimum has a right to decline the bonus requests at its sole discretion.
- To withdraw the bonus, the full verification of Client Login Page is required.
- If withdrawal or transfer of the Client's own funds from a trading account takes place, the bonus shall be automatically revoked (nullified) from the Client's account.
- In case Free Margin on a trading account falls below the bonus amount, the company has a right to close open positions, as well as revoke the bonus without prior notice, if the above-mentioned requirements for the volume of transactions (the number of closed lots) have not been fulfilled.
- If trading account balance falls below the bonus amount and there are no open positions on the Client's account, the bonus shall be revoked within 24 hours.
- Bonuses shall be automatically revoked, if the Client has not performed trading operations within 20 trading days.
- The company can change the bonus terms at any time with a subsequent notification.
- The trading turnover made by the Client is calculated in lots of the normalized volume. The calculation includes all transactions made with any trading instrument.
1 lot of the normalized volume is the volume of the trading operation, the nominal value of which is 100.000 USD.
$$\text{Normalized volume of the trading operation} = (\text{Nominal value of the trading operation}) / 100.000 \text{ USD}$$

Nominal value of the trading operation = XXXUSD * Volume * Contract size, where:
XXXUSD - the price of the asset in relation to USD at the time of performing the trading operation;
Volume - the volume of the trading operation;
Contract size - standard size of the trading operation, corresponding to 1 lot.
